

**Simplify Crew Stay Logistics.
Cut Costs & Boost Productivity.**

CrewStay.com
The Better Way to Manage Crew Logistics

Introducing:

Simplify Crew Stay Logistics. Cut Costs & Boost Productivity.

Crewstay is the ultimate solution for managing crew bookings and hotel contracts. It has been specifically engineered from the ground up, in response to the unique needs of the aviation industry. It is **the better way to manage crew stay reservations.**

- **Automate Manual Reservation Process**
- **Enforce Corporate Spending Policy**
- **Improve Back Office Efficiency**
- **Analyze Spending**
- **Address Audit and Compliance Requirements**

The system cuts costs and saves money by providing a common platform to book hotel rooms for all staff. This ensures that contracted rates are booked, and that in the absence of hotel contracts that staff are booking best available rates. It also provides up to the minute reporting of what the organization is actually spending on hotel room rates.

CrewStay System Highlights

- Hosted solution tailored to an Airline's specific destinations, route system, and contracted properties.
- Supports defining hotel contracts, alternative properties, as well as FBO utilized properties if applicable.
- Rapid booking for virtually an unlimited number of crew members in one transaction.
- Real-time access to contracted rates, corporate rates, and BAR (Best Available Rates).
- Real-time comparison of BAR rates to contracted rates and ability to book lower rates if available.
- Real-time online reservations reporting.
- Automated reporting via email.
- Compliance enforcement to enforce the booking of contracted properties and contracted rates.
- Compliance tracking supports Sarbanes Oxley adherence.
- Supports the creation and management of advance room blocks.
- Protects against duplicate bookings and no-shows.
- Can interface with Airline's internal systems via webservice.
- State-of-the-art online support system.

Hotel Contract Management

The built-in contract rate monitoring ensures that hotels are providing rates as contracted and the system automatically alerts you to those hotels that need to be contacted due to offering incorrect rates. This ensures that contracted hotels are always honoring their contracted rates.

All contract information is maintained online, accessible from anywhere, including the ability to upload a copy of the contract in pdf or word doc format.

Group Bookings

The crewstay system supports making bookings for individuals as well as groups. The crewstay system can support a group booking of virtually an unlimited number of people at once. Each person has their own individual booking generated so that the individual booking can easily be edited or cancelled without affecting any other booking within the group. All bookings can have additional airline specific information tracked with the booking such as pairing or booking identification number, aircraft tail number, billing codes, etc.

Advance Blocks

Crewstay makes the process of booking and managing blocks extremely efficient and easy. The room block system even supports managing blocks offline as excel spreadsheets and then uploading them to update the system. The system tracks if a guest name is a valid name or a placeholder and will automatically cancel any bookings without a valid guest name to ensure that only actually required rooms are booked. The system has specifically been designed to be able to interface with an airline's crew scheduling system to provide the highest level of automation. The system supports having the hotel's update confirmation numbers directly online.
